Summary

Software Developer and Builder with a strong bias towards shipping, learning fast, and solving real problems. Proven experience in building AI-powered platforms and tools that are production-ready, integrating critical services, and deploying native cloud systems at speed. Passionate about systems, backend, product thinking, and building for scale.

Technical Skills

Languages: Python, Java, C, JavaScript, SQL

Backend: FastAPI, Flask, PostgreSQL, REST APIs

Frontend: React, Next.js 14 (SSR, App Router), Flutter

Cloud: AWS (S3, Lambda, EC2, AppRunner, Step-functions), Docker, GitHub Actions, CI/CD

Other: System Design, OOP, DSA, NLP, CV, ML.

Experience

Amazon

Jan 2026 – Present

Software Development Engineer I (SDE-1)

- Contributing to large-scale privacy infrastructure, building services for on-demand and programmatic data deletion to ensure compliance with global data regulations.
- Working with AWS-native architectures (DynamoDB, S3, Lambda) to build scalable, fault-tolerant services handling high-volume deletion and compliance requests.
- Collaborating cross-functionally with internal teams to enhance reliability, observability, and performance of privacy-critical services.

WhatsYum

Feb 2024 – Dec 2025

Software Development Engineer – [May 2025 - Present]

SDE Intern – [Feb 2024 - May 2025]

- Built an AI-powered WhatsApp ordering platform integrating POS, delivery, payments, and ONDC APIs; improved backend throughput by 40% using FastAPI, PostgreSQL, and AWS.
- Developed AI assistants for automated support and product recommendations.

Invsto

Oct 2023 – Mar 2024

Software Developer Intern

- Built 10+ backend modules for trading APIs; improved latency by 30% and deployed quant workflows to production.

Projects

Assessify – AI Interview and Screening Platform

Feb 2024 – Present

assessify.in — [YouTube Demo](#) — **Accepted into the AWS Startups Activate Program**

- Designed full-stack AI interview system that generates custom questions from resumes and job descriptions. Used Next.js 14 (App Router, SSR), FastAPI, PostgreSQL, AWS S3, GitHub Actions (CI/CD).
- Voice-based interaction, automated scoring, and company dashboards for candidate assessments.

Brain Tumor Segmentation (Mobile App)

Oct 2022

- Built an Android app using Flutter to detect brain tumors in CT scans using the UNET deep learning model.
- Flask API deployed on AWS to handle the prediction pipeline.

Word Search Puzzle App

- Developed a GUI-based game in Python with 5000+ words; displays definitions for found words.
- Strengthened Python, file handling, and event-based programming understanding.

Education

B.Tech, Computer Science – AI & ML Keshav Memorial Institute of Technology, JNTUH	<i>2021 – 2025</i> CGPA: 8.1
Narayana Junior College, India Intermediate – MPC	<i>2019 – 2021</i> Grade: 94%
Hyderabad Public School (ICSE) High School	<i>2019</i> Grade: 90%

Leadership & Achievements

AWS Activate Founder – Accepted into the AWS Startups Activate Program for Assessify.

HackRevolution Hackathon – Secured 2nd place in a national-level hackathon by Muffakham Jah College under the Generic Software Domain.

ICAI Commerce Wizard Finalist – Top 500 students nationwide.

NCC ‘A’ Certificate Holder – Led troop of 15 cadets, participated in 10+ community events.

IAYP Bronze Awardee – Duke of Edinburgh’s Award for leadership, volunteering, and adventure.
